

THE FORM TUTOR FIGURE

Each class will be assigned a 'form tutor' from among the Secondary teachers, a mentor who will be a point of reference for them for the duration of the three-year school term.

Every Friday, during tutor time, the students will have the opportunity to share with their mentor not only school-related topics, but also topics related to **personal growth** and **current affairs**.

The tutor will also be available to give **individual support** to the children who need it.

A FEATHER IN OUR CAP

Sport holds a place of importance within the Chatterbox Secondary project curriculum, to which an entire day is also dedicated in May for the entire school.

For this reason, the school, as well as availing itself of the collaboration of teachers who are also **professional athletes**, has entered into an agreement with the **Terrapieno** facility in Cagliari, which is equipped with playgrounds and large, fully-equipped spaces for the practice of various sports activities.

Each student registers as a member of the sports club at a cost of €10 and is able to **use the facility during his or her free time outside school** from September to August, including evenings and weekends.

Of all the experiences on the Secondary pathway, the most sought-after and expected are those **abroad**. They differ according to age group: **sports camps** or **educational study trips** to various parts of Italy, Europe or the UK.

SECONDARY PROJECT

Cambridge Assessment
International Education
Cambridge International School

A WINDOW OF THE WORLD

Chatterbox Secondary Project was founded in September 2016 as a **three-year bilingual pathway**, allowing children and families to be able to enjoy an international educational and cultural system without having to move abroad. An international educational and cultural system without having to move abroad.

With official entry into the **Cambridge Assessment International Education** circuit as of 2021, Chatterbox is the only school in Sardinia to offer an international course for Lower Secondary school.

It is a new didactic approach that is based on the system of **parental education**, it allows students a more personalized study pathway and is able to offer an annual connection with the ministerial system thanks to an aptitude exam.

The Secondary pathway supports the growth of the individual, his or her potential and the development of excellence, both in the educational and sporting spheres, and encourages the acquisition of clear certifiable skills, such as **language and IT certification**.

The educational pathway provides an **integrated curriculum with the British system** through the teaching in **English** of the **majority of subjects** as detailed in the syllabus table alongside.

In addition to the listed subjects, **all classes participate in numerous events** such as concerts at Cagliari's Teatro Lirico, visits to museums, civic education activities, customised orientation sessions for high school, Sports Day, and thematic workshops such as the one with the Postal Police on online security.
