

CHAPTER 3

The Picnic in Hyde Park

The following day, Emily and her family invited Charlie to a **picnic in Hyde Park**. Charlie was excited to explore the famous park and taste some delicious London treats. They found a perfect spot under a big, shady tree, and spread out a colourful blanket.

Emily's mom had packed a feast: sandwiches, strawberries, cookies, and, to Charlie's delight, a big jar of honey!

 Colour the picnic blanket and draw the delicious food that Emily's mum brought to the park.

As they enjoyed their picnic, Charlie noticed a group of children flying kites nearby. He had never flown a kite before and was eager to try.

Emily and Charlie ran over to the children and asked if they could join. The children welcomed them with open arms and even helped Charlie **make his very own kite**. After a bit of running and some friendly guidance, Charlie's kite soared high in the sky, dancing in the wind. Charlie laughed with joy, feeling the summer breeze on his fur.

As the sun began to set, Charlie and his new friends sat around the picnic blanket, sharing stories and giggles. Emily told her friends about that time she wanted some jam. She tiptoed into the kitchen, climbed up on the counter, and opened the cupboard. Just as she reached for the jar, it slipped from her fingers and landed with a splat, covering her and the floor in sticky, sweet strawberry jam. **What a disaster!** Everybody agreed that it must have been very satisfying licking her fingers afterwards, though.

Make your own origami kite! If you don't have any origami paper at home, use the paper square on page 8.

Step 1. Prepare your origami squared paper.

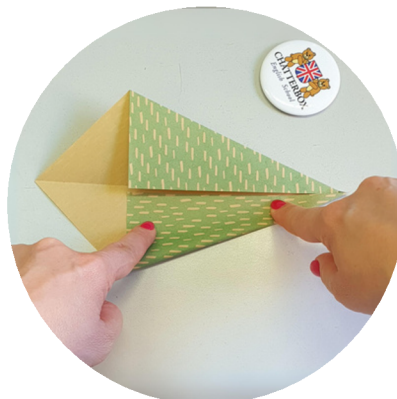

Step 2. Fold in half diagonally.

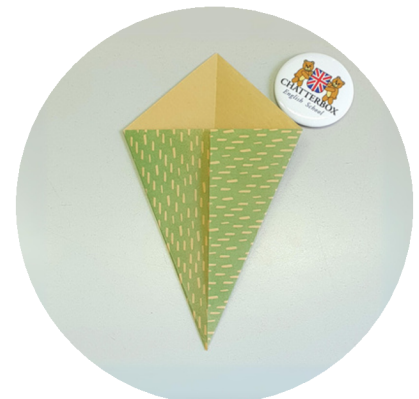

Step 3. Unfold the central crease in Step 2.

Step 4. Fold the lower left edge along the crease.

Step 5. Now repeat Step 5 on the other side.

Step 6. You have completed your origami kite!

Cut out the square below and use it to make your origami kite. Colour it in as you like or draw a pattern. For a better result, we suggest you also colour and draw on the back of the square too.
